# 1 375mw energy storage system in Russia

#### **Overview**

Should Russia create an infrastructure for EV charging stations?

Russia must also "create an infrastructure for charging stations" for EVs, he said. Rosatom announced on November 23 that it had established a new subsidiary — Renera — dedicated to the manufacture of energy storage systems.

Is energy storage a 'contributory Revolution'?

BNEF analysts believe that energy storage around the world will grow exponentially, from a modest 9 GW / 17 GWh commissioned by 2018 to 1,095 GW / 2,850 GWh by 2040. Experts call the ongoing global changes a "contributory revolution".

Will Russia build a Gigafactory in 2023?

January 5, 2023: Russia's prime minister Mikhail Mishustin (pictured) says work has started on the first of a potential series of gigafactories as it scrambles to ramp up domestic battery manufacturing capacity for energy storage systems and EVs, after foreign investors and partners quit the country over the war with Ukraine.

Is a stationary energy storage boom coming?

A stationary energy storage boom is forecast for the next two decades, according to a report by the US consulting firm Bloomberg New Energy Finance (BNEF). BNEF analysts believe that energy storage around the world will grow exponentially, from a modest 9 GW / 17 GWh commissioned by 2018 to 1,095 GW / 2,850 GWh by 2040.

How many EV batteries will Kaliningrad produce a year?

Rosatom says the Kaliningrad gigafactory will produce 50,000 EV batteries annually. US-based battery producer EnerSys announced last March that it was suspending its operations in Russia following the country's "illegal military

action against a sovereign Ukraine".

Will Russia achieve 'technological sovereignty' for the automotive industry?

Mishustin told a meeting of deputy prime ministers on December 26 that Russia had to achieve "technological sovereignty" for the automotive industry in particular — and state-owned corporation Rosatom had started building a 4GWh lithium ion batteries plant in the Baltic Sea enclave of Kaliningrad. The plant should start operations in 2025.
