

## SolarInvert Energy Solutions

# 100MW battery storage

## Overview

---

How many mw can a battery store?

As of 2021, the maximum capacity of a battery storage power station is 4,588 MW.

Does Sungrow have a battery energy storage system?

Image: Sungrow Sungrow has agreed to supply battery energy storage system (BESS) technology to a large-scale project in Malaysia, one of Southeast Asia's biggest projects of its type.

How does the energy storage system work?

Each energy storage unit is connected to the 35kV distribution unit of the booster station through a 35kV collector line and then boosted to 220kV via a 120MVA (220/35kV) transformer. The project is equipped with an energy management system (EMS) to receive grid dispatching commands and manage the charge and discharge of the energy storage system.
