

## SolarInvert Energy Solutions

# 16A 48V Inverter

## Overview

---

What is a sunsynk Max 16kw inverter?

The Sunsynk MAX 16kW is a low voltage (48V) hybrid inverter suitable for off-grid, grid support, back-up and self-consumption PV systems. Moreover, the inverter can also be used in both three-phase and single phase parallel applications. The largest single-phase hybrid Inverter on the market.

How many X inverters can be connected?

A total of 15 x inverters can be connected in a three-phase configuration (five units per phase) - giving a maximum power output of 240kW. 3 x inverters can be connected in a single-phase configuration giving a total power of 48kW. Contains 3 x MPPTs to allow for flexible PV array designs and improved efficiency.

Why is a 40khz PWM inverter a good choice?

With a traditional low-voltage 48V silicon field-effect transistor (Si-FET) inverter, the switching losses at 40kHz PWM can already be significantly higher than the conduction losses and hence dominate the overall power losses. To dissipate the excess heat, a larger heat sink is required.

Why do inverters lose power at 40khz?

Conversely, the inverter losses increase with the switching frequency. With a traditional low-voltage 48V silicon field-effect transistor (Si-FET) inverter, the switching losses at 40kHz PWM can already be significantly higher than the conduction losses and hence dominate the overall power losses.

What is a low voltage 3 phase inverter used for?

Low-voltage 12V to 60V DC-fed three-phase inverters in the power range of 1kW are used in many applications such as collaborative and humanoid robots, automated mobile robots, automated guide vehicles (AGV), servo drives, and non-military drones.

How does a 3 phase inverter work?

The three-phase inverter operates from a wide input voltage range 12V to 60V and offers onboard power management that provides a 5V rail to supply the LMG2100 gate driver and 3.3V band-gap reference well a 3.3V rail for the INA241 current-sense amplifiers and temperature switch.
