# 200 kW energy storage power station in Toronto Canada

#### **Overview**

How many MW of energy storage projects are there in Canada?

"At Energy Storage Canada we're excited to see the IESO's announcement of more than 700 MW of energy storage projects as the next step in Canada's largest energy storage procurement to date," said Justin Rangooni, Executive Director, Energy Storage Canada.

How much energy storage capacity will Ontario have by 2026?

The IESO expects Ontario will have at least 1217 MW of energy storage capacity active in the market by 2026. The seven projects announced as part of the initial 739 MW are in different places throughout the province and range in size from 5 to 300 MW.

Could 1000 MW of energy storage Save Ontario electricity?

A 2020 report commissioned by Energy Storage Canada, Unlocking Potential: An Economic Valuation of Energy Storage in Ontario, found that 1000 MW of energy storage in Ontario could provide as much as \$2.7 billion in savings for Ontario electricity customers.

Why did Ontario announce 2500 MW of energy storage?

The announcement is part of the province's ongoing procurement for 2500 MW of energy storage to support the decarbonization and electrification of Ontario's grid, which was originally announced in October, 2022.

Where can I find information about energy storage in Canada?

For further information visit: 16 May 2023 Today the Independent Electricity System Operator (IESO) announced seven new energy storage projects in Ontario for a total of 739 MW of capacity.

How big is Canada's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Canada had 138MW of capacity in 2022 and this is expected to rise to 296MW by 2030. Listed below are the five largest energy storage projects by capacity in Canada, according to GlobalData's power database.
