

SolarInvert Energy Solutions

Algeria Group Solar Energy Storage

Overview

What is Algeria's solar power supply chain?

The Algerian solar power supply chain grew significantly in the last decade and now seeks to add IPP development, engineering and design capabilities, EPC services, inverters manufacturing, storage solution manufacturing, universal certification expertise, and operations and maintenance services.

How much solar power does Algeria have?

By the end of 2023, Algeria had 437 MW of solar generation capacity, according to the national Commission for Renewable Energies and Energy Efficiency (CEREFE). The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m²/year in the north and 2,263 kWh/m²/year in the south.

Where are solar panels made in Algeria?

Alongside Zergoun, the manufacturer Lagua Solaire has 200 MW of annual capacity for solar panel production in Algeria. The production plant of Algerian telecommunications and renewable energy company Milltech has a facility in Mila, in the east of the country, with a production capacity of 100 MW for M3-based modules. Manufacturing hub.

Are there solar investment opportunities in Algeria?

We are proud to present our findings on solar investment opportunities in Algeria. This report provides a snapshot of Algeria's business environment and, major macroeconomic trends, while analysing issues related to foreign investment barriers and the country's political situation.

How much electricity does Algeria generate a year?

Algeria currently generates a relatively small amount of its electricity (e.g., three percent or 686 MW annually), from renewable sources, including solar (448 MW), hydro (228 MW), and wind (10 MW).

When will a 300 MW solar power plant be built in Algeria?

The state-owned China State Construction Engineering Corporation (CSCEC) began building a 300 MW solar power plant in Algeria's Oued Province in March 2024 as part of the Solar 1,000 MW program. The project is slated for completion by late 2025 or early 2026.
