# **Algeria Solar Photovoltaic Power Generation Module**

#### **Overview**

Where are solar panels made in Algeria?

Alongside Zergoun, the manufacturer Lagua Solaire has 200 MW of annual capacity for solar panel production in Algeria. The production plant of Algerian telecommunications and renewable energy company Milltech has a facility in Mila, in the east of the country, with a production capacity of 100 MW for M3-based modules. Manufacturing hub.

Who will ship Astronergy n-type solar modules to Algeria?

China International Water & Electric Corp. (CWE) and the Power Construction Corporation of China (POWERCHINA) will ship one gigawatt (GW) of Astronergy n-type TOPCon solar modules to Algeria. The 220MW Biskra project is one of the largest in the 2,000MW plan, and its construction has already started.

How much solar power does Algeria have?

By the end of 2023, Algeria had 437 MW of solar generation capacity, according to the national Commission for Renewable Energies and Energy Efficiency (CEREFE). The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m²/year in the north and 2,263 kWh/m²/year in the south.

When will a 300 MW solar power plant be built in Algeria?

The state-owned China State Construction Engineering Corporation (CSCEC) began building a 300 MW solar power plant in Algeria's Oued Province in March 2024 as part of the Solar 1,000 MW program. The project is slated for completion by late 2025 or early 2026.

What is Algeria's 2,000 MW solar plan?

The 2,000MW plan is a photovoltaic power plant construction plan proposed by Sonelgaz, Algeria's state-owned power utility. The plan is to build 15 solar power plants in the country's 12 provinces, each with a capacity ranging from

80 to 220 MW. Most of the solar projects in this plan are constructed by Chinese companies.

How much energy does Algeria produce a year?

The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m²/year in the north and 2,263 kWh/m²/year in the south. Nevertheless, nearly 100% electrified Algeria generates 99% of its energy from domestic gas.
