# Are there any new lithium battery packs

#### **Overview**

Where can I buy a lithium ion (Li-ion) battery pack?

Battery Packs A 1300 mAh, 3.5 mm thick Li-ion battery pack with 26-pin FPC connector. Battery Packs A 1300 mAh, 3.5 mm thick Li-ion battery pack with 26-pin FPC connector. Lithium Ion (Li-Ion) Battery Packs are available at Mouser Electronics. Mouser offers inventory, pricing, & datasheets for Lithium Ion (Li-Ion) Battery Packs.

What is a standard battery pack?

The two standard battery pack models, based on different chemical systems, offer products with various capacities. Each standard battery pack is available in both lithium iron phosphate and ternary, allowing users to choose the power supply according to their needs.

Will electric vehicles use new batteries first?

Colder conditions typically slow charging speeds and reduce range for electric vehicle battery packs. There was no confirmation which vehicles – and from which brands – would use the new batteries first, with the new tech announced along with several other innovations at the CATL event.

How many battery swap stations will be built in 2025?

Each standard battery pack is available in both lithium iron phosphate and ternary, allowing users to choose the power supply according to their needs. The endurance mileage ranges from 400 kilometers to 600 kilometers, according to the report. The CATL claimed that it is expected to build 1,000 battery swap stations by 2025.

Will a new 'naxtra' battery reduce costs?

A third innovation may further reduce costs, with CATL confirming it will begin manufacturing sodium batteries – instead of lithium – under the 'Naxtra' brand for FAW (First Auto Works) freight trucks from December 2025. FAW operates

in cold climates in the north of China near Russia's Siberia as well as Mongolia.

Are sodium batteries safe?

While offering greater cold/hot weather resilience, maintaining as much as 90 per cent charge, sodium batteries can also withstand damage making them safer in an accident. They may also be a cost-effective replacement for leadacid batteries used in internal combustion-powered cars and lithium-batteries in hybrid vehicles.
