

### **SolarInvert Energy Solutions**

# Armenia Solar Lighting Power System

#### **Overview**

Energy is one of the sectors in Armenia, seeing notable transformations in the last 20 years. As the country has no confirmed oil or natural gas resources, now the energy policy is focused on developing native energy sources, mainly renewables. According to the International Energy Agency.

Using the potential of renewable energy is essential for Armenia. It unlocks benefits for the economy, businesses, the environment, and consumers. The Strategic Program for the Development of the Energy Sector of the Republic of Armenia (until.

Prices of solar power plants vary depending on their type, volume of energy consumption, capacity, and other factors. Before making a choice among different possibilities, it's better to research the market and use consultation services.

Armenia's significant potential for the growth of the solar energy sector and the development of technologies has been attracting a large.

The current largest solar power plant is located in the village of Tsapatagh near lake Sevan commissioned by the Tufenkian Foundation and built by the Optimum Energy Company in 2021. The station is the first in the region that uses a solar tracking system.

What is solar energy in Armenia?

Solar energy in Armenia is an important source of renewable energy, and its technologies are broadly characterized as active solar or passive solar, depending on how they capture and distribute solar energy or convert it into solar power.

Is Solara a green economy in Armenia?

THIS IS NOT FUTURE. THIS IS NOW! Solar photovoltaic installation company SOLARA has adopted a strategy to carry out activities in the field of the green economy in Armenia and promote its development. Why Choose Solara?

There is a great potential for solar energy in Armenia.

What is Armenia's largest solar power plant?

The 200-megawatt plant named Ayg-1 will be Armenia's largest solar power plant with a capacity of around half of Armenia's main energy generator, the Metsamor nuclear power plant. The plant is planned to be built in the Aragatsotn province in an area of over 500 hectares located in Talin, Dashtadem, Katnaghbyur and Yeghnik communities.

What is Armenia's energy mix?

According to the International Energy Agency, in 2019 renewables represented 8.8% of Armenia's energy mix. Around 32% of the electricity generation came from renewable resources including hydro. Armenia manages to cover 24% of energy demand with domestic production, which comes mostly from nuclear and hydro energy.

What does solarm do?

SolARM presents its solutions in the field of solar energy, the goal is to develop the clean and renewable energy sector in Armenia, to ensure energy security, to use the great potential of Armenia's solar energy.
