Baku Energy Storage Power Generation Project

Overview

ACWA Power and Azerbaijan's Ministry of Energy signed an Implementation Agreement on a 200 MW Battery Energy Storage System (BESS) project in May 2024. Will Azerbaijan deploy a battery energy storage system?

Signing of documents in Baku, Azerbaijan. Image: Republic of Azerbaijan, Ministry of Energy. Power plant developer ACWA Power and the government of Azerbaijan have signed an agreement to potentially deploy a battery energy storage system (BESS) in the central Asian country.

Is China a key partner in Azerbaijan's adoption of battery energy storage systems?

China is poised to become a key partner in Azerbaijan's adoption of Battery Energy Storage Systems (BESS) and other advanced energy technologies. During COP29, Azerbaijan's Ministry of Energy signed a Memorandum of Understanding with China Southern Power Grid International (Hong Kong) Co., Ltd and Powerchina Huadong Engineering Corporation Limited.

How much power does the Baku Dam generate?

The Baku Dam generates 2400 megawatts of power. It would provide electricity for all of Karakas and for industries and cities in mainland Malaysia through a cable under the South China Sea. At 650 kilometers, this would be the longest cable in the world.

When will a 50 MW energy storage facility be operational?

During the project's first phase, a 50 MW energy storage facility is expected to be operational by the end of this year or early next year. It's worth recalling that in early May 2024, Azerbaijan's Ministry of Energy signed an implementation agreement with Saudi Arabia's ACWA Power for the development of a 200 MW energy storage system.

Are solar energy trends relevant for Azerbaijan?

These trends are highly relevant for Azerbaijan, and during the COP29 climate conference, the Baku International Sea Trade Port (BISTP) and Malaysia's Tiza Green Energy (a subsidiary of Citaglobal) launched the country's first project integrating solar energy with a Battery Energy Storage System (BESS).

When will a 250 MW battery energy storage system be operational?

In September of this year, Azerenergy announced a new tender for the development of a 250 MW Battery Energy Storage System (BESS) project, slated for completion by 2027. During the project's first phase, a 50 MW energy storage facility is expected to be operational by the end of this year or early next year.
