Battery Energy Storage System Ranking

Overview

Which battery energy storage system integrators are the best in 2024?

AC side: Leading manufacturers between China and the U.S. maintain strong positions amid competition. The top five global battery energy storage system (BESS) integrators in the AC side for 2024 were Tesla, Sungrow, CRRC Zhuzhou Institute, Fluence, and HyperStrong. Tesla and Sungrow secured the top two global positions.

Who makes the best energy storage cells in 2024?

In 2024, DC-side shipments showed a clear ranking. CATL and BYD remained the top two with a strong lead, followed by PotisEdge, Hithium, and RelyEZ. Notably, CATL, BYD, and the newcomer Hithium are top energy storage cell makers, increasingly expanding into system integration.

Which Chinese energy storage manufacturers are the best for 2023?

In a highly anticipated release, Black Hawk PV has disclosed the top ten rankings of Chinese energy storage manufacturers for 2023. Leading the pack is CATL with an impressive 38.50% market share and a robust shipment volume of 50 GWh.

Who are the top energy storage cell makers?

Notably, CATL, BYD, and the newcomer Hithium are top energy storage cell makers, increasingly expanding into system integration. Top cell makers, with their technology and supply chain advantages, are strengthening their competitiveness in the full industry chain through vertical integration.

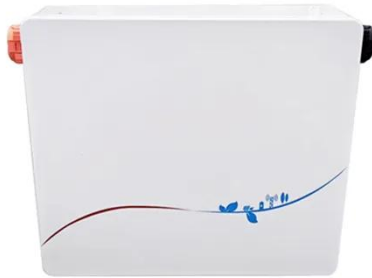

How many energy storage lithium battery projects are planned?

Over 78 energy storage lithium battery-related projects have been planned nationwide, representing a significant investment of CNY 569.861 billion and a planned construction capacity of approximately 1.4 TWh. Renewable energy installations coupled with energy storage systems.

What is the capacity of lithium power (energy storage) batteries in China?

Current statistics reveal that as of July this year, the capacity of the lithium power (energy storage) battery industry has reached nearly 1,900 GWh in China. However, the actual utilization rate of lithium power (energy storage) batteries is reported to be less than 50%.
