

SolarInvert Energy Solutions

Battery cabinet profile photovoltaic production process

Overview

What type of batteries are used in energy storage cabinets?

Lithium batteries have become the most commonly used battery type in modern energy storage cabinets due to their high energy density, long life, low self-discharge rate and fast charge and discharge speed.

What is a 30kW photovoltaic storage integrated machine?

Among them, the 30KW photovoltaic storage integrated machine has a DC voltage of 200~850V, supports MPPT, STS, PCS functions, supports diesel generator access, supports wind power, photovoltaic, and diesel power generation access, and is comparable to Deye Machinery. The Energy Management System (EMS) is the "brain" of the energy storage cabinet.

What are battery cells made of?

Our battery cells are all made of new A-grade cells, with a single cell voltage of 3.2V, and the current production of battery Pack capacity is mainly 100Ah, 200Ah, and 280Ah. Use steel belts for pressing and packing, form 8 cells into 1 Module module, 2 Module modules into 1 Box Pack, and dissipate heat through ducts and fans.
