# **Battery cabinet storage site** warning requirements

#### **Overview**

The 2024 International Fire Code (IFC) introduces Section 320, which provides guidelines to protect facilities from fire risks associated with lithium battery storage Safety. What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is where Article 320, Safety Requirements Related to Batteries and Battery Rooms comes in.

Can lithium battery storage meet section 320 requirements?

Investing in fire-resistant storage cabinets or rooms specifically designed for lithium battery storage is one of the most effective ways to meet Section 320 requirements. Upgrading fire suppression systems to include water-based sprinklers, foam, or gas suppression methods offers critical protection.

Do you need documentation before entering a battery room?

It is a requirement to have all the documentation in place prior to authorized personnel entering a battery room to perform a specific work task on a battery system under normal operating conditions. However, it is likely the employee will need to enter the battery room to deal with a battery system that is not operating normally.

What standards are used in a battery room?

Common standards in the battery room include those from American Society of Testing Materials (ASTM) and Institute of Electrical and Electronic Engineers (IEEE). Model codes are standards developed by committees with the intent to be adopted by states and local jurisdictions.

What are the requirements for a battery handling facility?

Floors shall be of acid resistant construction unless protected from acid

accumulations. Face shields, aprons, and rubber gloves shall be provided for workers handling acids or batteries. Facilities for quick drenching of the eyes and body shall be provided within 25 feet (7.62 m) of battery handling areas.

Are battery storage systems dangerous?

There has been a fair amount of news about battery storage systems being involved in fire and explosion incidents around the world. Do not forget that these are not the only safety issues when dealing with batteries. Battery systems pose unique electrical safety hazards.
