Berlin 50GWh new generation energy storage lithium battery

Overview

How many battery storage systems were installed in Germany in 2024?

Almost 600,000 new stationary battery storage systems were installed across Germany in 2024, increasing the country's storage capacity by 50 percent year-on-year, according to preliminary data from the German Solar Industry Association (BSW Solar).

What if a battery storage project was approved in Germany?

If only half of these projects were approved, they would store enough energy to power 30 million German households for one day. Battery storage is needed to supplement the country's rapid rollout of renewable energy installations, which reached a new record share in electricity production of 55 percent in 2024.

Are lithium-ion batteries the future of energy storage?

While lithium-ion batteries have dominated the energy storage landscape, there is a growing interest in exploring alternative battery technologies that offer improved performance, safety, and sustainability.

Are lithium-ion batteries a viable energy storage solution for EVs?

The integration of lithium-ion batteries in EVs represents a transformative milestone in the automotive industry, shaping the trajectory towards sustainable transportation. Lithium-ion batteries stand out as the preferred energy storage solution for EVs, owing to their exceptional energy density, rechargeability, and overall efficiency.

What is the Berlin battery lab (BBL)?

The Berlin Battery Lab (BBL) will combine the strengths of the three partner institutions: BAM has internationally recognized expertise in battery safety and electrochemical energy materials. HU Berlin is a leader in Germany in academic research on sodium-ion batteries. HZB is particularly active in

research on lithium-sulfur batteries.

Why is Berlin a good place to study lithium-sulfur batteries?

Berlin has established itself as an important location for research into sodiumion batteries and lithium-sulfur batteries. The city offers concentrated expertise in these areas, supported by numerous research projects and highprofile research groups.
