Bess system for solar factory in Canberra

Overview

Will the Bess power Canberra in 2026?

Scheduled to begin operations in 2026, the BESS will store enough renewable energy to power one-third of Canberra for two hours during peak demand, playing a pivotal role in achieving the ACT's net-zero emissions target by 2045.

What is the act doing to secure Canberra's energy supply?

Generic artist impression of a utility scale battery project. The ACT Government is further securing Canberra's energy supply with a new long-term partnership with Macquarie's Green Investment Group global specialist energy storage team, Eku Energy.

What is a battery energy storage system (BESS)?

This is often in the early evenings when demand peaks and the sun is no longer shining. The large-scale battery energy storage system (BESS) will provide at least 250 megawatts (MW) of power. This is enough energy to power one-third of Canberra for two hours during peak demand periods.

What is the Big Canberra battery project?

The Big Canberra Battery project has also considered the role of neighbourhood-scale batteries in the ACT's battery ecosystem. generate revenue for the ACT.

What is EKU energy's big Canberra battery project?

With the capacity to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods, the project is a crucial component of the ACT government's Big Canberra Battery initiative. Eku Energy has established an innovative revenue swap arrangement with the ACT government, ensuring mutual benefits for both parties.

What is the Williamsdale Bess project?

This project will assist in increasing energy security and reliability for Canberra's residents. Umwelt was engaged by Eku Energy to provide planning and approvals advice for the Williamsdale BESS. The team assessed ecological, heritage and physical constraints and sensitivities to guide the detailed design and placement of the BESS.
