Boston CRRC Battery Energy Storage

Overview

What is CRRC battery energy storage system?

Our battery energy storage system (BESS) product portfolio spans the largest utility scale batteries down to commercial systems. CRRC has installed/signed 48+ GWh (Q2 2025) of grid connected BESS, with #1 ranking in China, #3 globally, Bloomberg Tier 1 and a growing international portfolio.

How do battery storage systems improve grid resilience?

ing supply and demand (see Figure 9). However, battery storage systems helped bridge the gap by providing stored energy when solar generation was unavailable, demonstrating their importance in enhancing grid resilience and ensuring uninterrupted energy supply, especially in regions heavil.

Where are CRRC battery cells sourced?

Battery cells are sourced from trusted partners. Led by CRRC Zhuzhou Institute's Comprehensive Energy Division. Engineered from our rail heritage, for reliability and longevity. Our Australian team of battery and renewable experts, senior electrical engineers and experienced technicians is supported by our skilled colleagues in China.

What is a battery management system?

Our in-house Battery Management System is installed in each energy storage unit. They interface with our Energy Management System to monitor and control multiple PCS and energy storage units. The EMS coordinates diverse generation systems, loads and the grid interface for optimal safety, reliability and return on investment.

Who is CRRC?

CRRC has installed/signed 48+ GWh (Q2 2025) of grid connected BESS, with #1 ranking in China, #3 globally, Bloomberg Tier 1 and a growing international portfolio. We design and manufacture the whole industrial supply

chain for our BESS products, including IGBTs and sensors, converters, battery packs, battery enclosures, BMS, EMS and substations.

Why does California have a surge in battery-storage capacity?

eration components, reached 2,300 MW. This surge in battery-storage capacity reflects the increasing importance of energy storage in California's grid infrastructure, facilitating grid stability, renewable integr on, and o erall system reliability. Figure 8. Total capacity of CAISO-partici
