Brasilia Photovoltaic Power Plant Generator Set

Overview

How many solar power systems are there in Brazil?

As of March 31, 2023, home and building owners have installed more than 1.8 million renewable distributed generation systems in Brazil, totaling about 19 gigawatts (GW) of capacity, the vast majority of which is solar, according to the Brazilian Electricity Regulatory Agency (ANEEL).

When did photovoltaic installation start in Brazil?

The first grid-connected, building-integrated photovoltaic (BIPV) installation in Brazil in Florianópolis (27°S, 48° W). The photovoltaic (PV) installation has an installed power of 2.078 kWp and started operating in 1997. Moving into the 2010s, Brazil saw a movement that would gain increasing momentum.

Does Brazil have a potential for photovoltaic energy?

During the era of isolated systems, some companies began to recognize Brazil's potential for photovoltaic generation. But it wasn't only the private sector that became interested in this source—the public sector also began seriously considering the possibility of expanding the electricity matrix with photovoltaic solar energy.

How much electricity does Brazil generate in 2023?

Boosted by wind and solar energy, electricity generation in Brazil ended 2023 with an increase of 10,324.2 megawatts (MW), according to the National Electric Energy Agency (Aneel). In December alone, 1,900 megawatts (MW) were added, as 51 new generating units across the country entered commercial operation.

What is the biggest solar power project in Brazil?

The plant is developed by Enel. Enel through EGBP has started operating its Lapa solar park, which is the biggest solar power project operation in Brazil at present. The plant is situated in Bom Jesus da Lapa, in the north-eastern state

of Bahia. Lapa project is made up of 2 plants: Lapa- with an installed capacity of 78 megawatts.

How big is Brazil's electricity growth?

The annual growth surpassed the target of 10,302.4 MW set by Aneel for last year. This marks the largest expansion in Brazil's electricity matrix since 2016, when 9,527.8 MW were added to power generation.
