

#### **SolarInvert Energy Solutions**

# **British coal-to-electricity energy storage equipment**

#### **Overview**

What is a battery energy storage system?

The two farms, one at the site of a former opencast coal mine, will store enough electricity to power three million homes. Battery Energy Storage Systems (BESS) are gradually being constructed across the UK. The main reason is to help balance the electricity grid, which is powered by renewables.

Why are battery energy storage systems being built in the UK?

Battery Energy Storage Systems (BESS) are gradually being constructed across the UK. The main reason is to help balance the electricity grid, which is powered by renewables. Almost 90 per cent of the electricity generated in parts such as Scotland last year was from low-carbon sources.

Is Coalburn a good investment in UK energy storage?

The 500MW/1,000MWh Coalburn project in Scotland, UK, currently under construction. Image: CIP. Despite a 12% year-on-year fall in the capacity of newly submitted planning applications in 2024, there is still a strong interest in the UK energy storage market as a whole.

Will SSE Renewables build a second battery energy storage system?

150MW battery storage facility will be built on site of former iconic Ferrybridge coal power station SSE Renewables has taken a Final Investment Decision to proceed with, and entered into contracts to deliver, its second battery energy storage system (BESS).

Why are two massive battery farms being built in the UK?

Developers have noted that the two massive battery farms where work is continuing will have an immense significance. The two farms, one at the site of a former opencast coal mine, will store enough electricity to power three million homes. Battery Energy Storage Systems (BESS) are gradually being constructed across the UK.

How much battery storage capacity is there in the UK?

Fig 1: There is over 440 GWh of battery storage capacity in the UK pipeline including 274 GWh (61%) at the pre-planning stage. Most of the projects are in the early stages: either announced by developers, included in the TEC register, or have screening/scoping applications submitted.
