

## SolarInvert Energy Solutions

# Canadian Energy Storage System Fee Standards

## Overview

---

What are energy storage requirements?

1.1 These requirements cover an energy storage system (ESS) that is intended to receive and store energy in some form so that the ESS can provide electrical energy to loads or to the local/area electric power system (EPS) when needed. Electrochemical, chemical, mechanical, and thermal ESS are covered by this Standard.

What is the energy storage standard?

1.4 This Standard covers energy storage systems for stationary indoor and outdoor installations. This Standard also covers mobile energy storage systems as defined by this Standard. This Standard includes requirements for energy storage systems used in residential and non-residential installations.

Who is energy storage Canada?

Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally.

How much energy storage does Canada need?

Canada's current installed capacity of energy storage is approximately 1 GW. Per Energy Storage Canada's 2022 report, Energy Storage: A Key Net Zero Pathway in Canada, Canada is going to need at least 8 – 12 GW to ensure the country reaches its 2035 goals.

Is energy storage on the rise in Canada?

With a 68% increase in energy storage worldwide in 2022 and additional market commitments bringing the expected global installations to 130GW by 2023, its unsurprising awareness of the technology is on the rise. Some technologies, like pumped hydro, have a long history in Canada.

What are the operating and application standards for compressed air energy storage?

The operating and application standards presented in these Provincial Standards for Compressed Air Energy Storage Applications and Operations (Standards) cover works used in association with compressed air energy storage (CAES) projects regulated under the Oil, Gas and Salt Resources Act.
