# Centralized photovoltaic and energy storage power station in New York USA

#### **Overview**

How many solar PV projects has NYC completed?

NEW YORK - NYC Department of Citywide Administrative Services (DCAS) Commissioner Dawn M. Pinnock today announced that since November 2020, the City of New York has completed 10 megawatts (MW) of solar photovoltaic (PV) projects on City properties; doubling the City's total capacity to a total of 22 MW.

What is the East River Energy Storage System project?

The East River Energy Storage System project involves the redevelopment of the Charles Poletti Power Plant property, the announcement says. The president of Con Edison, Tim Cawley, commented that the new battery system will help to maximise the benefit of the wind power being developed off the coast of New York.

How many MW of solar generating capacity will the city add?

Through an agreement between the City and the state Power Authority, this work will add over 30 MW of solar PV generating capacity and up to 10 MW of large-scale battery storage to provide energy to power City operations.

Why is energy storage important in New York?

"Energy storage technology has emerged as an essential component of the energy landscape and the proliferation of energy storage projects in New York is critical to meeting the state's ambitious climate change goals," said 174 Power Global President and CEO, Henry Yun, PhD.

When will a 100 MW battery storage project be completed?

The project, pending approval, is expected to be executed by the start of 2023. US solar project developer 174 Power Global Corp, an affiliate of South Korea's Hanwha Group, and Consolidated Edison Inc (NYSE:ED) have sealed a dispatch rights deal for the development of a 100-MW battery storage project

in New York City.

What is the total solar capacity of New York City now?

The City of New York has doubled its total solar capacity to a total of 22 MW since November 2020. NYC Department of Citywide Administrative Services (DCAS) Commissioner Dawn M. Pinnock today announced that the City has completed 10 megawatts (MW) of solar photovoltaic (PV) projects on City properties.

#### Centralized photovoltaic and energy storage power station in New \

### Centralized photovoltaic power station energy storage ...

This study builds a 50 MW "PV +energy storage" power generation systembased on PVsyst software. A detailed design scheme of the system architecture and energy storage capacity is ...
