Construction of new energy storage system in Sweden

Overview

A new partnership between SEB Nordic Energy, through its portfolio company Locus Energy, and Ingrid Capacity will enable the construction of 13 new large-scale battery energy storage systems across southern Sweden, adding an additional 196 MW of flexible capacity to the national grid. When will a battery energy storage system be built in Sweden?

Construction has begun on Sweden's largest Battery Energy Storage System (BESS) undertaken by Neoen, an Independent Power Producer and Nidec, a system integrator. The project has been projected to come online in early 2025. Neoen is headquartered in Paris.

What is the largest battery energy storage system in Sweden?

The project is the largest in Sweden which is under construction. Image: Neoen. Independent power producer (IPP) Neoen and system integrator Nidec have started construction on a 93.9MW/93.9MWh battery energy storage system (BESS) in Sweden, the largest in the country.

How many large-scale energy storage systems are there in Sweden?

The initiative, led by Ingrid Capacity in collaboration with BW ESS, consists of 14 large-scale energy storage systems with a total capacity of 211 MW/211 MWh. This milestone investment represents a significant step toward Sweden's goal of achieving a carbon-neutral energy system.

When will Ingrid capacity build a new battery storage facility in Sweden?

As a next step, Ingrid Capacity is about to commence the construction of another 13 new battery storage facilities in Sweden by the end of 2024, with a capacity of 196MW/196MWh, further strengthening the Swedish electricity grid in the SE3 and SE4 price areas.

What is Sweden's largest energy storage investment?

Sweden's largest energy storage investment, totaling 211 MW, goes live,

combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW / 211 MWh into the region.

Which Swedish energy storages are being built in 2024?

13 February 2024 SWEDEN – The energy storages are being built in Falköping (16 MW), Karlskrona (16 MW), Katrineholm (20 MW), Mjölby (8 MW), Sandviken (20 MW), Vaggeryd (11 MW), Värnamo (20 MW) and Västerås (11 MW). A storage with a power of 20 MW correlates to what a Swedish town with 40,000 inhabitants on average consumes during peak hours.
