Contact Victoria 5G base station construction unit

Overview

What is a 5G base station?

A 5G network base-station connects other wireless devices to a central hub. A look at 5G base-station architecture includes various equipment, such as a 5G base station power amplifier, which converts signals from RF antennas to BUU cabinets (baseband unit in wireless stations).

Why do Victorians need better mobile coverage and 5G?

Better mobile coverage and 5G is on the way through around 1,200 mobile projects. Victorians depend on good mobile connectivity. It's important for access to healthcare, education and flexible working, and it's critical in emergencies.

Where can I find information about mobile phone base stations?

Information about proposed and current mobile phone base stations is available on the Radio Frequency National Site Archive (RFNSA) at You can subscribe to receive information about future installations of Small cells are installed by Telcos to provide improved coverage and capacity in local areas for both 4G and 5G services.

What is end-to-end 5G construction?

End-to-end solutions for the construction of 5G sites that are both future proof and cost effective for mobile networks that will operate profitably. Know more!.

How many connecting Victoria projects will be delivered?

More than 700 of the projects will be delivered in regional and rural locations. This investment is part of the \$550 million Connecting Victoria program to fast-track better mobile and broadband in as many places as possible.

What is end-to-end solutions for 5G radio sites?

End-to-end solutions for the construction of 5G radio sites that are both future-proof and cost-effective for mobile networks that will operate profitably. We help service providers maintain cutting-edge infrastructure that meets today's needs and future growth.
