# Cylindrical lithium battery production battery pack

#### **Overview**

What is a lithium battery pack?

The Lithium Battery PACK line is a crucial part of the lithium battery production process, encompassing cell assembly, battery pack structure design, production processes, and testing and quality control. Here is an overview of the Lithium Battery PACK line: Cell Types Cells are the basic units that make up the battery pack, mainly divided into:.

What are the production processes of a battery pack?

Outer Packaging: Provides physical protection. Output Interfaces: For connecting the battery pack with external devices. Production processes cover cell selection and grouping, welding, assembly, aging testing, inspection, and packaging. Assembly Production Line The process flow of the PACK production line includes:

How to contact lithium battery pack engineering team?

Tel & Wechat: (0086) 158 6765 3608 Mr.Pan Our engineering team offers design solutions. The Lithium Battery PACK production line encompasses processes like cell selection, module assembly, integration, aging tests, and quality checks, utilizing equipment such as laser welders, testers, and automated handling systems for efficiency and precision.

What are the components of a battery pack?

Busbars and Soft Connections: For electrical connections between cells. Protection Board: Includes the Battery Management System (BMS), responsible for battery protection and monitoring. Outer Packaging: Provides physical protection. Output Interfaces: For connecting the battery pack with external devices.

Why should you choose our automated battery pack assembly line?

Our automated battery pack assembly line is highly standardized and suitable

for over 90% of cylindrical battery products on the market. It features unique double-sided cross spot welding equipment for one-time welding, reducing costs and simplifying ope.

What is a battery test equipment?

Environmental Test Equipment: For testing the environmental adaptability of batteries. Aging Test Equipment: To assess battery life and stability. BMS Test Equipment: For testing the functions and performance of the battery management system. These devices ensure that the lithium battery PACK meets performance and safety standards.

#### Cylindrical lithium battery production battery pack

### (Infographics #3) Battery Making at a Glance

Jun 14, 2023 · (Infographics #3) Battery Making at a Glance The manufacturing process of lithium-ion batteries consists largely of 4 big steps of electrode ...
