

### **SolarInvert Energy Solutions**

# Czech charging station solar energy storage

### **Overview**

Why is battery storage important in the Czech Republic?

To do so, battery storage will be essential. By coupling onsite generation with battery energy storage systems (BESS), organisations will be able to really monetise their renewable energy assets. What triggered the fast growth of renewables in the Czech Republic?

.

Who makes the first EV charging station in the Czech Republic?

It is the first of its kind in the Czech Republic. The charging station was supplied by Kreisel Electric from Austria. The charging station with the model name Chimero 180 from Kreisel Electric can charge EVs with up to 180 kW and is intended for locations with insufficient grid capacity.

Why do we need a charging station in the Czech Republic?

"We believe that this type of charging station will contribute to developing the charging infrastructure in the Czech Republic thanks to its ability to compensate for the lack of electricity quickly and without taking up much space.

Will a battery storage system help Czech companies achieve net zero?

The high penetration of renewable generation projects in the region could deliver a large amount of clean energy and really accelerate the journey to net zero, but at the moment Czech companies are not in a position to reap the full benefits of solar and other renewable energy sources. To do so, battery storage will be essential.

How many fast-charging stations will ez build in 2025?

For 2025, the company plans to build at least 100 more fast-charging stations. ČEZ operates its charging network under the name Futurego and has a

corresponding range of charging cards and charging apps. cez.cz Czech energy supplier and charge point operator ČEZ has installed a fast-charging station with battery storage in Prague.

Why are Czech businesses investing in renewable projects without subsidies?

The subsidy increases to cover up to 75% of costs for community projects. But what we noticed at Wattstor is that Czech businesses are investing in renewable projects even in the absence of subsidies, because they have realised the strong business case for generating clean energy on site.
