Democratic Congo Energy Storage Photovoltaic Power Generation Project

Overview

Is a 600 MWp solar plant being built in Congo?

Sun Plus, a unit of The Sandi Group (TSG), has launched construction work on a 600-MWp solar plant in the Democratic Republic of Congo that is part of an even larger project totalling 1 GWp. The two-phase scheme, known as the Kinshasa Solar City, includes the installation of a number of solar photovoltaic (PV) parks near the capital of the country.

Could solar power change energy consumption in Congo?

Solar power could change energy consumption in Congo. - The Loudima family in Congo have long been without electricity but they have found an environmental solution: solar power. In the remote districts of Pointe Noire, the Congolese start-up Hélios Électricité has installed a solar power plant.

How much energy will DRC generate?

The initial strategic partnership framework agreement suggests that energy generated in the first stage is estimated to be 20MW, benefiting over 100,000 people. With the total capacity of 400MW, the multiple power stations are expected to solve the problem of energy inadequacy of DRC.

What is Kinshasa Solar City?

The two-phase scheme, known as the Kinshasa Solar City, includes the installation of a number of solar photovoltaic (PV) parks near the capital of the country. The 600-MWp phase one was initiated on August 19 and is expected to be completed within a year.

Will Hanergy meet DRC's 65% electrification target by 2025?

José Maboya Nzalingo, General Secretary of Ministry of Energy and Hydraulic Resources said: "Our strategic partnership with the global clean energy giant, Hanergy is a step ahead towards meeting DRC's original target of 65% electrification by 2025, letting alone the new Sustainable Development Goals

of universal electricity access by 2030.
