

### **SolarInvert Energy Solutions**

# Discharging time of container energy storage cabinet

#### **Overview**

What are the advantages and disadvantages of electric storage system?

advantages of the lower capability margin, cost reduction by substituting the electric storage system for an adjusting thermal power generation and other benefits, while consumers have the advantages of lower electricity prices with the day time consumption of stored power generated at night, etc.

Why is a gas extinguishing equipment installed in a container?

A gas extinguishing equipment is installed in the container in consideration of the potential for a fire to occur, as many electric parts including the cells are installed in the container. The installation of fire extinguishing equipment in the container minimizes and optimizes the amount of extinguishing gas, and reduces the extinguishing time.

What is the difference between a battery rack and a container?

The battery rack consists of the required number of modules, the Battery Management Unit (BMU), a breaker and other components. The container consists of the required number of the battery racks, as well as air conditioning and fire extinguishing equipment.
