

SolarInvert Energy Solutions

Doha Photovoltaic Power Station Inverter

Overview

What is Al Kharsaah solar?

of Qatar's peak electricity demand covered by Al Kharsaah. Located 80 km west of Qatar's capital, Doha, the Al Kharsaah Solar PV Independent Power Producer (IPP) project is the country's first large-scale solar power plant and is set to significantly reduce its environmental footprint.

Is Qatar a good place to develop solar energy?

Qatar boasts the ideal conditions for developing solar energy with its exceptional sunshine and vast unoccupied spaces. This is where the Al Kharsaah solar power plant, developed by TotalEnergies and its partners QatarEnergy and Marubeni, was inaugurated in October 2022.

How does Al Kharsaah solar power plant work?

The plant also features a semi-automated cleaning system for the solar modules that cleans the dust and sand off every single module once every four days. The Al Kharsaah solar power plant was built in two phases of 400 megawatts-peak (MWp) each, and therefore has a full capacity of 800 MWp.

How big is Al Kharsaah solar power plant?

The Al Kharsaah solar power plant covers 1,000 hectares (the equivalent of approximately 1,400 soccer fields) and features two million bifacial solar modules mounted on trackers for achieving substantial power gains.
