ETRA outdoor base station

Overview

What is a Hytera dib-r5 outdoor base station?

The Hytera DIB-R5 Outdoor Base Station is part of the TETRA innovative SMART system, featuring a compact and lightweight architecture.

What is a tetra integrated base station?

The TETRA integrated Base Station (iBS) is a base station suitable for outdoor and indoor operation. Thanks to its small size and lightweight, the TETRA iBS is easily transported, flexibly mounted, and quickly deployed, which reduces the networking cost. The TETRA iBS can be mounted on walls and the top of antenna masts.

Why should you choose a dib-r5 outdoor base station?

Low operating costs while the coverage stays reliable. Compact & space-saving design – the DIB-R5 outdoor can be mounted on walls, antenna masts or tunnels. critical or battery-based , porta-ble base station solutions are demanded. Prepared for harsh environments with IP65 protection class and a temperature range from -30 to +55 °C.

What is an outdoor base station?

The Outdoor base station has a maintenance-free, space-saving design and can be installed on walls, antenna masts or in tunnels. Thanks to its market-leading low power consumption and passive cooling, it is ideal for use in areas where power supply is critical or where there is a need for battery-based, portable base station solutions.

What is a TETRA system?

With its high reliability and unique design it is the ideal solution for mission-critical communications. Mast-mountable and compact IP65-encapsulated TETRA system, a powerful base station transceiver and distributed controller ideal for outdoor or indoor mounting.

What is a dib-r5 outdoor antenna?

The DIB-R5 outdoor is designed for outdoor operation in harsh conditions thanks to IP65 rating. With compact structure and weighing only 10 kg, it can be flexibly mounted on the wall or pole to extend coverage. Offering up to two TETRA carriers, the DIB-R5 supports dual diversity for optimal reception and low power consumption.
