

#### **SolarInvert Energy Solutions**

# East Africa lithium battery energy storage cost

#### **Overview**

Are battery energy storage systems developing in Africa?

Confirmed development of Battery Energy Storage Systems (BESS) across Africa is still small compared to global projections, says a study. The confirmed development of Battery Energy Storage Systems across Africa is still small compared to global projections – less than 0.5% of the global BESS capacity of 358GW by 2030.

Does Scatec have a solar-plus-storage site in South Africa?

Scatec's Kenhardt solar-plus-storage site in South Africa (above), which went online at the end of 2023. Image: Scatec. Africa's energy storage market has seen a boom since 2017, having risen from just 31MWh to 1,600MWh in 2024, according to trade body AFSIA Solar's latest report.

How long do lithium-ion batteries last?

It further says that lithium-ion batteries are currently dominating the global market, delivering up to eight hours of storage and showing minimal degradation over 10 years. "But other technology options are emerging fast that could cater more cost-effectively for evolving system requirements.

What are the most popular solar-plus-storage developments in Africa?

As noted by AFSIA Solar, one of the most notable solar-plus-storage developments in Africa is Norway-based independent power producer (IPP) Scatec's 225MW/1,140MWh Kenhardt project in South Africa. The site started operation in late 2023 (pictured above).

How has the cost of batteries changed since 2022?

As such, the costs associated with batteries have decreased, making them much more accessible. Indeed, since 2022, the cost of battery packs and cells has decreased year-on-year, with 2023 registering a 13% decrease and 2024 trumping this with a 20% reduction.

Is Bess a viable power system for Africa?

The African Continental Power System Masterplan (CMP) study into BESS says that considering Africa's rapidly growing power requirements and the already planned contributions from variable renewable energy (VRE), these commitments do not fully reflect the potential for BESS on the continent.
