Egypt Wind and Solar Energy Storage Civil Engineering Project

System Topology

Overview

Cairo is redrawing the map of its energy future with a USD 1.6 billion (EGP 79.36 billion) handshake sealed with Norwegian developer Scatec to build a 1 gigawatt (GW) solar plant and a wind energy project, beginning an ambitious push toward shedding its reliance on natural gas and embracing the promise of renewables. Who financed Egypt's wind farm?

The €110 million wind farm was supported by soft loans from Denmark, Spain, Japan and Germany. The project is linked to the New and Renewable Energy Authority, the government institution responsible for the promotion and development of renewable energy projects in Egypt.

How many solar power plants are there in Egypt?

The 37km2 park has been connected to Egypt's National Grid since 2019 and was developed in line the Egyptian New and Renewable Energy Authority's agenda. The project comprises 41 solar power plants and was built to the tune of \$4 billion by 30 companies. Gabal Al-Zait: 580 MW Wind Farm.

Will Egypt generate 42% of its electricity by 2035?

The project was completed in 2015. Egypt aims to generate 42% of its electricity from renewable sources by 2035. and the country's wind energy and solar potential is moving the country towards the goal.

What is a large-scale energy storage project?

The project aims at providing the scientific, technological and policy basis required for the development and implementation of large-scale energy storage in Egypt, enabling increased penetration of renewable energy sources in the Egyptian energy system.

Who owns the Gulf of Suez I Wind Farm?

The Gulf of Suez I wind farm has an installed capacity of 262 MW, generated by 125 onshore wind turbines. Located near on the Gulf of Suez, the project is

owned and operated by Ras Ghareb Wind Energy Company, a joint venture comprising Engie, Toyota Tsusho, Orascom Construction and Eurus Energy.

Where is Egypt's first wind farm located?

The state-owned Zafarana wind farm is located in Suez and was built in eight phases between 2000 and 2010, making it one of Egypt's first wind farms. The farm is 120km 2 in size and boasts 700 turbines with a combined capacity of 545 MW. The €110 million wind farm was supported by soft loans from Denmark, Spain, Japan and Germany.
