

#### **SolarInvert Energy Solutions**

# **Energy storage cabinet container standard**

#### **Overview**

● The energy storage container standard unit has its own independent power supply system, temperature control system, heat insulation system, flame retardant system, fire alarm system, mechanical interlock system, escape system, emergency system, fire protection system and other automatic control and security systems. What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO4) combined with an intelligent 3-level battery management system (BMS);

What energy storage container solutions does SCU offer?

SCU provides 500kwh to 2mwh energy storage container solutions. Power up your business with reliable energy solutions. Say goodbye to high energy costs and hello to smarter solutions with us.

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and lowcarbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.
