#### **Overview**

Will Tesla build a grid-scale battery energy storage station in China?

Tesla has officially signed a ¥4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.

How many green charging pile units are there in Shanghai?

State Grid Corp of China displays its charging facilities for new energy vehicles during a carbon neutrality expo in Shanghai in June. [Photo/China Daily] Shanghai has put in place 1,526 green charging pile units since the beginning of this year for recharging new energy vehicles, State Grid Shanghai Municipal Electric Power Co said.

How can City's New charging facilities boost green power consumption?

These charging facilities are among the city's latest efforts to boost green power consumption through the creation of a new energy system that is clean, low-carbon, safe and efficient.

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.

Are recharging units certified new energy electricity?

With this batch of facilities, we can say that the electricity powering these recharging units is certified new energy electricity," said Tang Xiaodong, head of the municipal platform for public data collection and monitoring of charging and swapping facilities in Shanghai.

Will NEVs become a part of the energy storage system?

By 2030, NEVs will become an important part of the electrochemical energy storage system, the guideline stated. Shanghai has put in place 1,526 green charging pile units since the beginning of this year for recharging new energy vehicles, State Grid Shanghai Municipal Electric Power Co said.
