

**SolarInvert Energy Solutions**

# **Energy storage mobile power camper**

## Overview

---

Are mobile battery energy storage systems a viable alternative to diesel generators?

Mobile battery energy storage systems offer an alternative to diesel generators for temporary off-grid power. Alex Smith, co-founder and CTO of US-based provider Moxion Power looks at some of the technology's many applications and scopes out its future market development.

Can mobile battery energy storage systems replace dirty generators?

Fortunately, an innovative, cleaner solution is gaining traction to replace dirty generators: mobile battery energy storage systems (mobile BESS). Mobile BESS products provide mobile, temporary electricity wherever and whenever it's needed.

What is a mobile battery storage unit?

A mobile battery storage unit from Moxion, its product to displace diesel generators for construction sites, film sets and more. Image: Moxion. Background image: U.S. Department of State – Overseas Buildings Operations, London Office Mobile battery energy storage systems offer an alternative to diesel generators for temporary off-grid power.

What is mobile storage & how does it work?

Mobile storage offers a reliable, eco-friendly solution to replace noisy, disruptive diesel generators on film sets. Batteries can quietly power basecamps, lighting, catering, hair and makeup trailers and device charging. Their runtime can last for multi-day shoots, and they can easily adjust output to handle shifting energy needs.

How does the energy storage program work?

This complex software determines the energy storage benefits by taking into account all possible battery service revenue (ISO/RTO, utility and behind-the-

meter) and incentives. The program also calculates the costs including taxes, CapEx and O&M.

Can mobile battery storage replace diesel generators?

Mobile battery storage solutions are starting to gain traction and have immense potential to replace diesel generators for off-grid power needs. Recent projections estimated the global temporary power market at \$12 billion in 2021, growing to over US\$20 billion by 2028—a compound annual growth rate of nearly 8%.
