

**SolarInvert Energy Solutions**

# **Energy storage system factory in Israel**

## Overview

---

Israel's Brenmiller Energy has announced the opening of a "gigafactory" to manufacture the company's thermal energy storage systems, which store power as heat and then provide users with energy on demand via steam. What is the first thermal energy storage Gigafactory in the world?

Israel's Brenmiller Energy has opened what is believed to be the first thermal energy storage gigafactory in the world. Located in Israel's Negev desert, the thermal energy storage factory is expected to hit full capacity by the end of 2023. What is thermal energy storage?

The company believes it to be the first factory in the world of its kind. Thermal energy storage, true to its name, stores energy as heat — a crucial function as society transitions to renewable sources like solar and wind, sources that are now economically viable to gather but, alas, are as variable as the weather and seasons.

Who inaugurated Brenmiller's Gigafactory in Israel?

Left to Right: Dr. Ron Tomer, President of the Manufacturers Association of Israel, Avi Brenmiller, CEO and Chairman of Brenmiller Energy, Benny Biton, Mayor of Dimona, and Dr. Gideon Friedmann, Chief Scientist at the Israel Ministry of Energy inaugurate Brenmiller's gigafactory in Israel. Image: Business Wire.

How does Brenmiller's thermal energy storage system work?

Brenmiller's thermal energy storage system, called bGEN, can be charged in various ways, the company explained in a video— solar, wind, the grid when there's excess supply, industrial exhaust gas, and sundry other sources of heat or electricity.
