

SolarInvert Energy Solutions

Estonia photovoltaic energy storage

Overview

The €100M project, led by Baltic Storage Platform, will deliver some of Europe's largest battery storage complexes with a combined capacity of 200 MW and a total storage capacity of 400 MWh, putting Estonia in the best spot for efficient energy use. Can storage systems help reduce energy consumption in Estonia?

Estonia's climate minister, Yoko Alender, emphasized the role of storage systems in this transition, stating, "Estonia has a clear goal – by 2030, the amount of electricity we consume must come from renewable sources.

How will a battery energy storage park work in Estonia?

The battery energy storage park and its substation will be connected to the electricity transmission network using a 330kV AC underground cable, marking a first in Estonia. Baltic Storage Platform confirmed that the BESS will seek to ensure the stability and resilience of the Estonian electricity grid.

Will Estonia build 84MW solar-plus-storage portfolio in Latvia?

Earlier this year, the Estonian company partnered with Clean energy investment company Niam Infrastructure to build an 84MW solar-plus-storage portfolio in Latvia. The portfolio would be carried out in two phases, with the construction of 40MW of solar PV across six sites in a first phase.

Why is energy security important in Estonia?

As Estonia and its Baltic neighbors prepare for grid synchronization with the rest of Europe, energy security becomes a pressing issue. The ability to store and deploy energy as needed is crucial for balancing the power supply, especially as the region shifts towards renewable energy sources such as wind and solar.

What is the Baltic storage platform?

The project, spearheaded by the Baltic Storage Platform—a joint venture

between Estonian energy company Evecon, French solar producer Corsica Sole, and sustainable finance management company Mirova—aims to bolster energy security and support Estonia’s transition to renewable energy. Project Details.

What's new at Kirikmäe solar park in Estonia?

With an installed capacity of 77MW, the Kirikmäe solar park doubles the capacity of the previous ‘largest’ plant in Estonia. Image: Evecon. Estonian energy company Evecon and French asset manager Mirova have reached operational status at a 77.53MW solar park in Estonia.
