# **Estonian power grid energy storage system**

## Overview

---

The battery energy storage system (BESS) will be built at the Auvere industrial power plant complex in Ida-Viru county and will help balance the country's grid, state-owned utility Eesti Energia said today (30 January). Where is Estonia's largest battery storage facility located?

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County.

What is the electricity grid in Estonia?

The Estonian electricity grid consists of about 5,000 kilometers of transmission lines at voltages of 110 kilovolts (kV), 220 kV, and 330 kV. National Grid, a subsidiary of Eesti Energia, has responsibility for the power balance and real-time control of the grid.

Who is Eesti Energia?

Eesti Energia is a state-owned utility operating in Estonia but also abroad. Image: Eesti Energia. Eesti Energi has completed the procurement for its 26.5MW/51MWh BESS, the first of that scale in Estonia, with LG Energy Solution among the successful parties.

Does Tallinn have a power grid?

Tallinn's grid isn't your grandpa's power system. Here's the lowdown on their material magic: Lithium-ion Batteries 2.0: Forget clunky power banks. Tallinn uses graphene-doped anodes that charge faster than a Tesla Supercharger. One pilot site near Ülemiste Lake stores enough juice to power 500 homes during peak blackout seasons.

What is Eesti Energia's Energy Plan?

‘We are honoured to contribute to Eesti Energia’s energy plan for desynchronisation (disconnecting from Russia’s grid) in the Baltic countries,’ said Kyuwon Heo, Head of Grid ESS Europe at LG Energy Solution. Estonia is targeting an exit from electricity production from shale gas and a 40% renewable energy mix by 2030.

Is Eesti Energia launching pumped hydro energy storage projects?

Eesti Energia and a consortium of private companies are also launching separate, large-scale pumped hydro energy storage (PHES) projects, though these would come online in the late 2020s. Energy-Storage.news’ publisher Solar Media will host the 9th annual Energy Storage Summit EU in London, 20-21 February 2024.
