

## **SolarInvert Energy Solutions**

# **European Energy Storage Battery Swapping Cabinet Site**

#### **Overview**

How many battery swap cabinets are there?

With rich industry experience, we have deployed more than 5,000 battery swap cabinets and put into use 65,000+ smart lithium batteries, providing convenient services for drivers in more than 35 countries around the world, helping clients build a profitable and scalable battery swap business.

Why do you need an electric motorcycle battery swap cabinet?

The electric motorcycle battery swap cabinet has been the perfect fit. Its modular design allows us to add more cabinets as our fleet expands, without requiring any major infrastructure changes. This scalability feature has saved us significant costs and allowed us to easily accommodate our growing number of electric motorcycles.

What is the battery swapping infrastructure?

The battery swapping infrastructure is available to the 98%\* of NIO users that subscribe to its Battery as a Service (BaaS) leasing model, allowing them to own their vehicle without committing to a single battery. Designed to protect residual values.

What is a tycorun battery swap cabinet?

The swap cabinet uses intelligent charging strategies to optimize battery performance, with easy maintenance, real-time fault alarms. TYCORUN batteries are built for business swap applications, using top-tier cells that withstand high-frequency daily cycling, with shock resistance, high safety, and integrated smart 4G GPS.

Does Nio offer flexible EV battery swaps?

Flexible battery swaps for 98%\* of European users PSS 3.0, NIO's thirdgeneration PSS technology, is already bringing rapid Smart EV battery swapping within reach for NIO users across Europe, with over 30 PSS locations

now available across Denmark, Germany, Norway, the Netherlands, and Sweden.

How many EV batteries can a Nio battery swap a day?

• NIO continues the rollout of its advanced third-generation PSS 3.0 technology in Europe, increasing network coverage and convenience for its users • Latest third-generation PSS 3.0 locations in Malmö and Arlandastad, Sweden, can each perform up to 408 battery swaps per day and store up to 21 smart EV batteries
