# **Grid-side energy storage in Costa Rica**

#### **Overview**

How many kW can a power plant produce in Costa Rica?

The power generation plants in Costa Rica can jointly produce 3.5 million kW. This is the average composition of the Costa Rican matrix: The Energy Matrix is the total percentage of all natural resources from which energy is derived and then transformed into electricity to supply households, business and industries.

What is the energy matrix in Costa Rica?

The Energy Matrix is the total percentage of all natural resources from which energy is derived and then transformed into electricity to supply households, business and industries. In Costa Rica, ICE is in charge of managing and controlling this matrix through its National Control Center (CENCE) and the National Electric System (SEN).

Where to install solar panels in Costa Rica?

Garabito Thermal Plant. Installation of solar panel. Produced by the Direction of Communication, Costa Rican Institute of Electricity (ICE), San José, Costa Rica. Guanacaste Wind Park. Miravalles III Geothermal Plant. Miravalles Solar Park.

What makes Costa Rica a sustainable country?

Since the middle of the last century, Costa Rica explodes its renewable sources in a planned and balanced way; it is possible thanks to a diverse, sustainable, optimized and economical matrix. This matrix guarantees the energy supply thanks to the participation of the public and the private sector.

How much power does Reventazón provide in Costa Rica?

Reventazón Hydropower Plant in Siquirres with a generation capacity of 305.5 MW; this plant can supply power for 525,000 Costa Rican households. ICE provides power service for 94.4% of households, businesses, and industries in

the country. This numbers are huge if we compare them with the average 14% percent coverage in 1949.

Does Costa Rica have geothermal energy?

Costa Rica has researched and exploited it for almost 40 years. Today, Costa Rica exports its knowledge. Unlike the rest of renewable energies, which direct or indirect origin is solar radiation, geothermal is produced based on the heat that Earth transmits from its internal layers up to the surface; it is not climate dependent.
