

### **SolarInvert Energy Solutions**

# **Grid-side energy storage in Rwanda**

2MW / 5MWh Customizable

#### **Overview**

What can Rwanda learn from off-grid solar?

The decade of off-grid solar is a valuable lesson for the future calling for more deliberate steps towards just energy transitions for Rwandans, and as a result, a more just society at large. 1.

How many Rwandan households are connected through off-grid solar systems in 2021?

Circa 17.8% of Rwandan households are connected through off-grid, predominantly solar systems in 2021 (REG, 2021) which play an important role in the country's electrification strategy and the achievement of ambitious development goals.

Why are off-grid solar companies entering the Rwandan market?

The transformation of the off-grid solar sector has played a critical role in the country's rural electrification and development, and the policy and business environments have resulted in dozens of off-grid solar companies entering the Rwandan market.

Are there quality control measures for off-grid solar products in Rwanda?

A decade ago, when the market of off-grid solar solutions was still in its infancy, there were no quality control measures in Rwanda. However, the introduced quality standards for imported solar products have helped minimize the number of counterfeit products in the market.

Can refugees benefit from a solar subsidy in Rwanda?

Finally, the subsidy mechanism which is meant to bring off-grid solar energy to thousands of households across Rwanda, currently does not include refugees residing in the country, meaning they are not eligible to benefit from the financial support offered to the citizens.

What is Rwanda's rural electrification strategy?

The following Rwanda Rural Electrification Strategy (RES), finalized in 2016, was an important milestone in Rwanda's energy strategy as it set the goal of 100% electrification by 2024 (70% grid and 30% off-grid connections) (REG, 2022).
