Guatemala City Electric Signal Base Station Hybrid Power Supply

Overview

What is Guatemala's energy source?

This page is part of Global Energy Monitor 's Latin America Energy Portal. In 2018, Guatemala derived 57.43% of its total energy supply from biofuels and waste, followed by oil (29.54%), coal (7.68%), hydro (3.22%), and other renewables such as wind and solar (2.12%).

How much electricity does Guatemala have?

As of 2020, Guatemala had 4110 MW of installed electrical capacity, based primarily on hydro power (38.38%), fossil fuels (30.36%), and biomass (25.20%). Other renewable sources represented a much smaller percentage of capacity, including wind (2.61%), solar (2.25%) and geothermal energy (1.20%).

What is energy security in Guatemala?

Within that context, energy security is to be defined with accordance to to the electricity supply, taking into account needs and objectives of the country's energy policy . The key aspects of the energy security perspective in Guatemala are: adequacy, resilience and sovereignty .

How is electricity regulated in Guatemala?

Guatemala's electricity industry is regulated by the General Electricity Act (Ley General de Electricidad) and the CNEE (Comisión Nacional de Energía Eléctrica). The DGH (General Direction of Hydrocarbons) regulates the hydrocarbon sub-sector.

How can Guatemala achieve self-sufficiency and sustainability in the electrcity sector?

The possibilities of utilizing these resouces to achieve self-sufficiency and sustainability in the electricity sector. Guatemala aims to achieve 60% of its total electricity generation from renewables by 2020, while on the long term

80% of the total electricity generation .

Can biomass produce electricity in Guatemala?

Guatemala has a powerful agro-industrial sector with considerable biomass waste products, hence there is a large potential for generating electricity from agricultural biomass in the country . Guatemalan sugar mills already use their produced waste of biomass to generate electricity in the country .
