Guinea-Bissau mobile energy storage site wind power planning

Overview

How sustainable is the electricity sector in Guinea Bissau?

The electricity sector in Guinea Bissau is in the midst of a transformational reform towards a sustainable development characterized by reliable, greener and affordable service delivery.

How will solar power work in Bissau & Gabu?

In Bissau, solar photovoltaic (PV) plants will help reduce the average cost of electricity in the country and diversify the energy mix, while battery storage will help integrate this variable energy source into the grid. In Bafata, Gabu and Cacheu, the PV plants will provide cheaper and cleaner local power generation than current diesel production.

What is the country strategy for Guinea-Bissau?

Energy a key component of Country Strategy for Guinea-Bissau Guinea-Bissau's energy and transport infrastructure are at the core of the recently published Country Strategy Paper 2022-2026. News & Commentary.

How much money is needed to achieve universal electricity access in Guinea Bissau?

8. Around US\$ 263 million of public and private funding will be needed to achieve universal electricity access in Guinea Bissau by 2030. To achieve this goal, a combination of grid (70%) and off-grid (30%) solutions will be required to bring 400,000 additional new connections18.

Does Guinea-Bissau have electricity?

Guinea-Bissau has one of the lowest electrification rates in Sub-Saharan Africa with only 29 percent2 of the population -around 53 percent in urban areashaving access to electricity (Figure 1).

Can solar power be developed in Bissau & Bijagos?

An additional 30 MW of solar PV in Bissau, 36 MW in countryside cities and two solar PV mini-grids in the Bijagos islands could be developed according to a feasibility study completed in April 2020 with the support of the World Bank and ESMAP.
