# Guyana Distributed Photovoltaic Energy Storage Project

#### **Overview**

How many solar PV farms will Guyana have?

The main electric utility, Guyana Power and Light Inc. (GPL) is preparing plans for 3 utility scale solar PV farms totaling 30 MW for the national grid in the long term, as well as 0.75 MW Solar PV Farm at Wakenaam and a 4 MW Solar PV Farm at Onverwagt in the near future.

Is Guyana a good place to install solar PV?

As a result, most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh.

How is solar energy used in Guyana?

In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas. Under the Hinterland Electrification Programme, in excess of 19,000 solar PV systems had been installed in nearly 200 communities by 2018.

How many solar panels will be installed in Guyana in 2019?

In addition, 1.184 MW of solar PV systems will be installed at 80 public buildings in all 10 Administrative Regions of Guyana in 2019. These installations will result in estimated savings of G\$114 million and avoiding 1,415 tons of CO 2 emissions per year.

What is Guyana's main source of energy?

Guyana is currently dependent on imported petroleum-based fuels as its main source of energy.

Is the energy sector poised for significant transformation?

However, the Energy sector is poised for significant transformation due to Guyana re-committing itself to the development of its indigenous renewable energy resources and to pursue 100% renewable energy in electricity generation in its Green State Development Strategy.
