

SolarInvert Energy Solutions

Hanoi Outdoor Solar Power System

Overview

Does Hanoi city have solar energy potential?

The solar energy potential in Hanoi city was analyzed. A methodology for assessment of rooftop solar power technical potential has been presented. The total installed capacity and the total generated electricity of rooftop gridtied solar power system in Hanoi city are calculated.

What is the technical potential of rooftop solar power in Hanoi city?

In this paper, the technical potential of rooftop solar power in Hanoi city is evaluated by using high-resolution remote sensing images technology, it can be seen that the total annual installed capacity of rooftop PV power and the PV optimal in Hanoi city are about 13,169.72 MWp and 37,591,481.20 MWh/year, respectively.

Where is the 600 kW solar array in Hanoi?

The 600 kW floating PV array is located in Hanoi, Vietnam, and powers the Vinhomes Ocean Park, a complex comprising a residential area and park that was built recently in the city's outskirts.

Can rooftop solar power be used in Vietnam?

Vietnam has officially permitted excess output from rooftop solar power systems to be connected to the national grid at no more than 20% of installed capacity. The permission is mentioned in Decree 135/2024/ND-CP on self-use rooftop solar power development that the government issued on Tuesday with immediate effect.

Can a rooftop PV system be used in Hanoi city?

This research is conducted to analyze the technical potential of the rooftop PV system in Hanoi city from the perspective of energy supply with the help of high-resolution remote sensing images technology.

How to choose a suitable area for solar panels in Vietnam?

The suitable area for installing PV systems is determined for each rooftop in the city while solar radiation data ((1) horizontal, (2) inclined (according to the slope and roof direction) and (3) the optimal (when slope = latitude and direction = south)) are taken from Vietnam solar energy map [33].
