

#### **SolarInvert Energy Solutions**

# High temperature lithium battery pack

#### **Overview**

High operating voltage, stable during most of the application lifetime Wide Temperature Range from -20  $^{\circ}$ C to +200  $^{\circ}$ C Vibration & shock proof design Low self discharge rate is less than 1% per yearWhat is a high-temperature rechargeable lithium battery?

At CM Batteries, Our high-temperature rechargeable Lithium battery packs are renowned for their exceptional reliability, 1500 cycles from  $-40^{\circ}$ C to  $+85^{\circ}$ C, providing lasting power for your innovative devices. The profile of our high-temperature battery cell is 18650 cylindrical, assembled as a high-temperature 18650 battery pack.

What is a high-temperature battery pack?

When your devices work outdoors in winter and summer, our high-temperature battery pack can be discharged and charged for a long time at low temperatures below zero and high temperatures over 60°C. Our high-temperature battery packs are ideal for replacing the current standard 18650 and 21700 battery packs.

What is the operating temperature of a lithium battery?

VDOMDHTMLtml> High Temperature Battery - Your Trusted Battery Power Supply Partner in China! High Temperature Lithium Battery The operating temperature of ordinary batteries ranges from -20°C to +50°C. Those working below -20°C belong to a low temperature environment, and those working above 60°C belong to a high temperature environment.

Why do we need a cooling system for lithium-ion battery pack?

The stable operation of lithium-ion battery pack with suitable temperature peak and uniformity during high discharge rate and long operating cycles at high ambient temperature is a challenging and burning issue, and the new integrated cooling system with PCM and liquid cooling needs to be developed urgently.

What is the temperature of lithium thionyl chloride battery?

At present, the advanced high-temperature lithium thionyl chloride battery technology is still in the United States GE, APS, Tadiran, German Sunshine and other companies. Chinese companies can currently achieve lithium thionyl chloride batteries with a maximum temperature of 165°C, 125°C and 150°C.

What is a high-temperature battery cell?

The profile of our high-temperature battery cell is 18650 cylindrical, assembled as a high-temperature 18650 battery pack. When your devices work outdoors in winter and summer, our high-temperature battery pack can be discharged and charged for a long time at low temperatures below zero and high temperatures over 60°C.

#### High temperature lithium battery pack
