# Honiara cylindrical lithium iron phosphate battery

#### **Overview**

What is lithium iron phosphate (LiFePO4) battery?

Lithium Iron phosphate (LiFePO4) batteries are a variety of Lithium-ion rechargeable battery. LiFePO4 cells features with high discharging current, nonexplosive and long cycle life (IEC Standard: over 2000 cycles @ 0.2C rate), but its energy density is lower than normal Li-ion and Li-Polymer cells.

What is a LiFePO4 battery?

LiFePO4 batteries are a specific type of lithium-ion battery characterized by their use of lithium iron phosphate as the cathode material. This choice of material contributes to several advantageous properties: Safety: One of the most notable features of LiFePO4 batteries is their inherent thermal stability.

What are the different types of lithium phosphate batteries?

1. Cylindrical LiFePO4 Cells Cylindrical LiFePO4 cells are the most commonly used type of lithium iron phosphate batteries. They resemble the shape of traditional AA or AAA batteries and are widely employed in applications where high power and durability are essential.

Do lithium iron phosphate based battery cells degrade during fast charging?

To investigate the cycle life capabilities of lithium iron phosphate based battery cells during fast charging, cycle life tests have been carried out at different constant charge current rates. The experimental analysis indicates that the cycle life of the battery degrades the more the charge current rate increases.

Are lithium iron based battery cells suitable for ultra-fast charging?

From this analysis, one can conclude that the studied lithium iron based battery cells are not recommended to be charged at high current rates. This phenomenon affects the viability of ultra-fast charging systems. Finally, a cycle life model has been developed, which is able to predict the battery

cycleability accurately. 1. Introduction.

Who makes LiFePO4 batteries in China?

Melasta is one of the main producer and supplier for LiFePO4 batteries in China. Our batteries have the features due to our superior technologies and state of the art manufacturing facilities and investment on research and development. 1. Very long cycle life
