

SolarInvert Energy Solutions

How many phases does Pakistan have for energy storage and new energy

Overview

What is the current energy situation in Pakistan?

Despite having an impressive energy mix and great potential in both renewable and nonrenewable energy sources, Pakistan is currently facing an energy shortfall of around 3000 MW. The country is unable to utilize its energy resources properly.

How does the project support the energy transition in Pakistan?

The project supports the energy transition with the following measures: Supporting institutions in the Pakistani energy industry to adopt regulatory requirements, policy guidelines, or instruments for implementing the Renewable Energies Strategy.

What is Pakistan's Nationally Determined Contribution (NDC) in 2021?

Digitization and Decarbonization of Power Distribution Networks in Pakistan Pakistan's updated Nationally Determined Contribution (NDC) as of October 2021 sets a binding greenhouse gas (GHG) reduction target of 15 per cent compared to the 2015 baseline.
