How to conduct business with energy storage containers

Overview

Is energy storage a new business opportunity?

With the rise of intermittent renewables, energy storage is needed to maintain balance between demand and supply. With a changing role for storage in the ener-gy system, new business opportunities for energy stor-age will arise and players are preparing to seize these new business opportunities.

Do energy storage technologies compete with other solutions?

Energy storage technologies compete with other solu-tions to deliver or absorb power when needed. Existing solutions, like grid expansion or more interconnections, the establishment of a capacity market for gas-fired pow-er plants or strategic reserves, still receive a great deal of attention from policy makers, regulators and system op-erators.

Why do energy storage companies need a business model?

Operating energy storage technologies and providing the associated services gives them a unique position in the industry once more. To succeed, however, they need to own, operate and experiment with energy storage assets and design the business models of the fu-ture.

What is en-Ergy storage?

New entrants design-ing energy services solutions around storage and digital oferings are knocking on the door. For these players en-ergy storage is a mode to enter the market. Some players may only ofer storage capacity and will act as independent storage operators, as opposed to the independent power producers we know today.

How do energy stakeholders prepare for the energy transition?

Energy stakeholders need to prepare today to capture the business opportunities in energy storage and develop their own business models. In the energy transition, new players ofering intermittent power supply have

disrupted the old business models of utilities. The rise of storage technology will again lead to a shift in the industry.

Will energy storage become a new business line?

Energy storage will become a new business line in the energy world. The energy transition is changing the energy land-scape. New players have entered the industry, operating renewable energy generation capacity, while taking away sales from traditional utilities. Consumers have started to produce energy themselves, leading to lower demand.
