How to open a base station site

Overview

How do I start a base station setup?

Before starting a base station setup, the user needs to know and understand basic concepts of the base-rover setup. The location is the actual environment in which the base station will be installed. Typically, this means outside in an open sky environment (e.g. on the roof of a building or in an empty field).

Where should a base station be installed?

The location is the actual environment in which the base station will be installed. Typically, this means outside in an open sky environment (e.g. on the roof of a building or in an empty field). Figure 2 shows a typical fixed installation of several antennas, including a VeraChoke and a VeraPhase 6000, on a roof.

How should a base station antenna be installed?

The hardware installation guidelines are limited but important for reliable base station performance. The base station antenna should be installed in open sky conditions, away from external influences that hinder the direct line of sight between the antenna and the GNSS satellites.

How do I set up a GNSS base station?

For good performance, observe the following base station setup guidelines: Place the GNSS receiver in a location on the jobsite where equal range in all directions provides full coverage of the site. This is more important on larger jobsites, where the broadcast range of the base station radio may limit the operations of the system.

How to choose a base station?

This base station has achieved for 5-10 years. It is usually easy to arrange a stable mount for the antenna on the roof of a building. 2. Selecting equipment Longer cable -it has to be to minimize loss of signal and the heavier and more

unwieldy. 2. Selecting equipment 2. Equipment for antenna 2. Equipment for antenna 3. Power supply and Network.

What is base station operation?

This topic introduces the concept of base station operation, provides information to help you identify good setup locations, describes best practices for setting up the equipment, and outlines the precautions that you need to take to protect the equipment.
