# How to use the lithium-ion battery of Huawei 6G communication base station

#### **Overview**

Why should you choose Huawei intelligent lithium batteries?

Simple: IoT networking, from manual to Cloud O&M Intelligent: backup power to energy storage system Efficient: precise configuration and investment Safe: fault prediction, passive to proactive Huawei intelligent lithium batteries support Al dynamic peak staggering, evolving from backup power to energy storage systems.

What is a lithium battery & how does it work?

Lithium batteries provide backup power. When the mains is normal, the UPS charges batteries. When the mains fails, lithium batteries supply power to the UPS. 100 A/100 A@35°C (The actual charge current depends on the UPS charge capability.).

What is Huawei esm-48100b1 lithium iron phosphate battery 48v100ah?

Basic introduction of Huawei ESM-48100B1 lithium iron phosphate battery 48V100AH (basic description of the product, such as definition, function, etc.) ESM is an energy storage unit composed of lithium-ion batteries, with excellent charge-discharge characteristics, longer service life, and smaller self-discharge losses.

### How to use the lithium-ion battery of Huawei 6G communication bas

### Huawei 48V100AH lithium iron phosphate ...

Jan 12, 2022 · Parallel use: support multiple groups of ESM in parallel, CAN communication supports 32 groups, RS485 communication supports 16 groups.
