

SolarInvert Energy Solutions

Huawei lightweight energy storage battery brand

Overview

Huawei SmartLi Lithium Battery UPS provides reliable, high-performance energy storage, offering scalable and efficient backup power solutions for critical systems with enhanced safety and long-term sustainability. Does Huawei make power batteries?

While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials. Earlier in 2025, the company filed a separate patent on the synthesis of sulfide electrolytes — a key material known for its high conductivity but also high cost, sometimes exceeding the price of gold.

Which Huawei Device has the longest battery life?

Huawei recently announced the HUAWEI Y6p, an entry level device that has a triple-camera system, 64GB of storage and a massive 5000mAh (typical value) battery as its top features. The battery life it offers is the longest yet we've seen so far from the HUAWEI Y Series.

Why is Huawei developing a solid-state battery?

Huawei's design aims to boost safety and cycle life by mitigating degradation at this critical junction. Huawei's involvement in solid-state battery research reflects a broader trend among Chinese technology and automotive companies. While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials.

Does Huawei have a 3,000-kilometre range and 5-minute charging range?

While Huawei's claims of a 3,000-kilometre range and five-minute charging have generated widespread attention, experts warn that such figures remain theoretical and would require charging infrastructure that is not yet commercially available.

What is a solid-state battery?

The development signals a significant push by the tech giant to stake a claim in the fast-evolving solid-state battery landscape. The patent outlines a solid-state battery architecture with energy densities between 400 and 500 Wh/kg, potentially two to three times that of conventional lithium-ion cells.

Does China have a solid-state battery industry?

However, China has rapidly caught up. According to public data, Chinese entities now file over 7,600 solid-state battery patents annually, representing 36.7% of global activity. Meanwhile, Chinese battery manufacturers are preparing for industrialisation. CATL aims to begin pilot production of a hybrid solid-state battery by 2027.
