

SolarInvert Energy Solutions

Huawei power generation battery energy storage sector

Overview

The world's first batch of grid-forming energy storage plants has passed gridconnection tests in China, a crucial step in integrating renewables into power systems, with Huawei's grid-forming smart renewable energy generator solution achieving this milestone by demonstrating its successful large-scale application. Does Huawei make power batteries?

Although Huawei does not manufacture power batteries directly, its growing interest in upstream battery materials is notable. Earlier in 2025, the company submitted another patent focused on synthesizing sulfide electrolytes—a vital component known for its high conductivity but also high costs, sometimes exceeding the price of gold.

Why is Huawei pursuing solid-state battery research?

Huawei's engagement in solid-state battery research reflects a wider trend among Chinese technology and automotive companies. Although Huawei does not manufacture power batteries directly, its growing interest in upstream battery materials is notable.

What is Huawei digital power?

Huawei Digital Power is dedicated to enhancing the safety and stability of renewable integration by combining digital and power electronics technologies, leveraging technical experience and collaborating with global power companies, grid operators and electricity providers.

Is Huawei a TÜV SÜD certified grid-forming energy storage system?

In related news, Huawei Digital Power, in collaboration with SchneiTec, recently commissioned Cambodia's first TÜV SÜD-certified grid-forming energy storage project on June 11, 2025. This 12 MWh system includes a 2 MWh testbed that validated Huawei's grid-forming ESS technology.

Does Huawei have a sulfide battery?

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres and ultra-fast charging in just five minutes.

Is Huawei digital power a BNEF Tier 1 power inverter?

Huawei Digital Power is also recognized as a Tier 1 Power Inverter and Energy Storage Manufacturer by BNEF. It's not yet known if Huawei's Smart String Grid-Forming ESS platform will be used to provide grid support services, including inertia and short-circuit current. Grid-forming in Cambodia
